

Supporting Pupils with Medical Conditions Policy

Lead First Aider/ responsible manager: Zoe Ayling / Estelle Gilbert

Resourcing Lead: Sarah Mollett

Definition

Pupils' medical needs may be broadly summarised as being of two types:

(a) Short-term

- affecting their participation in school activities which they are on a course of medication.

(b) Long-term

- potentially limiting their access to education and requiring extra care and support (deemed **special medical needs**).

Rationale

Local Authorities and schools have a responsibility for the health and safety of pupils in their care. The Health and Safety at Work Act 1974 makes employers responsible for the health and safety of employees and anyone else on the premises. In the case of pupils with special medical needs, the responsibility of the employer is to make sure that safety measures cover the needs of all pupils at the school. This may mean making special arrangements for particular pupils who may be more at risk than their classmates. Individual procedures may be required. The employer is responsible for making sure that relevant staff know about and are, if necessary, trained to provide any additional support these pupils may need.

The Children and Families Act 2014, from September 2014, places a duty on schools to make arrangements for children with medical conditions. **Pupils with special medical needs have the same right of admission to school as other children and cannot be refused admission or excluded from school on medical grounds alone.** However, teachers and other school staff in charge of pupils have a common law duty to act in loco parentis and may need to take swift action in an emergency. This duty also extends to teachers leading activities taking place off the school site. This could extend to a need to administer medicine.

The prime responsibility for a child's health lies with the parent who is responsible for the child's medication and should supply the school with information. The school takes advice and guidance from the school nursing team. Contact details for our School Nurse can be found in the school office.

Aims

The school aims to:

- assist parents in providing medical care for their children;
- educate staff and children in respect of special medical needs;
- liaise as necessary with medical services in support of the individual pupil;
- ensure access to full education if possible.
- monitor and keep appropriate records.

Entitlement

The school accepts that pupils with medical needs should be assisted if at all possible and that they have a right to the full education available to other pupils.

The school believes that pupils with medical needs should be enabled to have full attendance and receive necessary proper care and support.

The school accepts all employees have rights in relation to supporting pupils with medical needs as follows:

- choose whether or not they are prepared to be involved;
- receive appropriate training;
- work to clear guidelines;
- have concerns about legal liability;
- bring to the attention of management any concern or matter relating to supporting pupils with medical needs.

Expectations

It is expected that:

- where parents have asked the school to administer the medication for their child they must provide prescribed medication only, in its original container and in date with the child's name and instructions
- Parents must also complete a signed administering medication letter and short term prescription medication must be collected by parents at the end of the school day.
- Only trained first aiders will administer medication, this will be signed and witnessed by two members of staff
- the school will liaise with the School Health Service for advice about a pupil's special medical needs, and will seek support from the relevant practitioners where necessary and in the interests of the pupil.
- In the instance of asthma pumps, parents will be notified by text of the dosage that children have taken.
- Any medicines brought into school by the staff e.g. headache tablets, inhalers for personal use should be stored in an appropriate place and kept out of the reach of the pupils. Any staff medicine is the responsibility of the individual concerned and not the school.

Policy into Practice

There is a need for proper documentation at all stages when considering the issue of support for pupils with medical needs in school.
